

MAKE A BOOK

(from Power Point Slides)

1. Use 8 ½" x 14" pieces of paper.
2. Lay the horizontal 14" side down.
3. Put 4 slides on one side of the paper and 4 more on the back of the paper for a total of 8 slides on both sides per piece of paper.

4. If you have 168 slides in total this will make 21 full pages of 8 slides on each piece of paper (4 on each side).
5. Put the pages together in order and fold in half with two staples in the middle of the pages.
